PATERSON  
BUILDERS

The Breezeway house has an amazing street appeal and from here your senses start to be stimulated by every aspect of this uniquely designed project. It isn't hard to see and feel the high level of skill and craftsmanship that has been passionately poured into the build of this home. The theme is reminiscent of a fifties-style fibro beach shack but with a bit of modernism thrown in. The outside areas are set up to enjoy the beach lifestyle that this location offers. The more you inspect the property the more you realise the amount of work that has gone into this build by all the trades involved.
